

13. The genealogical tree of human world

The soul and the supreme soul come into the corporeal drama of world cycle to play their respective roles. This world cycle is called the cycle of time or the eternal drama that takes place on the world stage. Soul, supreme soul and world cycle are eternal.

Religion has a profound effect on the human mind. The word "religious" is derived from the original Latin word religio, meaning "way of life". So religion is a part of human life from the beginning and religion is a culture. Religion, clan, race, language, nationality, culture, and ancestry have a great influence on a person's personality, beliefs, outlook, attitude, consciousness, and thought. Hence it is necessary to understand the original religion and culture of the mankind. It has been compared with a tree to elucidate the growth and illustrate development of the world. It depicts the history of whole cycle of all eras or ages with religiopolitical dynasties in the world. The tree of this human world cycle is described in the Shrimad Bhagavad Gita as "Kalpa-Vriksha" or in form reverted and wonderful tree, the seed of which is Supreme soul residing in supreme abode up above, while their children play role as human beings below. The picture of the tree indicates normal tree for understanding and divided in four parts of the four ages of the world cycle. The "Christmas tree" mentioned in Christianity is similar to this tree of human world cycle.

In the trunk of the human genealogical tree was the deity or angelic religion having complete self-sovereignty. Having sovereignty of deities, the custom and system were true. They were endowed with all virtues, full of 16 celestial degrees arts, complete viceless, full code of conducts, and non-violent deity religion, who are worshipped even today. Their kingdom was full of happiness, peace, bliss, divine love and power. This world is represented in various religions as "Heaven, Swarg, Bahist, Paradise, Golden age, Satyug", which was on our earth. Their souls have all qualities and powers of Supreme soul.

Deities or angels enjoy their fruit of actions i.e. use their accumulating power. In the Silver age, their qualities are slightly reduced but their kingdom remains full of happiness, peace, bliss, divine love and power. In both these ages, there are 8 generations of emperors and empresses and 100 kings and queens, whose memorial is accepted as rosary of 8 and 108 in different religion. The tassel on the rosary represents

KALPA TREE

Natural Calamities, International Atomic War & Civil Wars

Look! The Science-proud european Yadavas Will Destroy one Another in this international Atomic War {Mahabharat} like 5000 years ago

Be Pure Like A Lotus
Brahma (Arjuna) Last I.e. 84th Life
Heaven

The purity and Silence-power of Bharat Mother shaktis {pandavas} will Re-Establish Deity World Sovereignty

KALPA TREE **5000 YEARS**

God Shiva
Adi Dev Brahma
Adi Devi Saraswati

Rosary of 108 Beads of Bharat Mother Shaktis
Nectar of Godly Knowledge
Non Violent Army of Shiv Shaktis Which Transforms Vicious Hell into Vice Less Heaven Through Might of Godly Knowledge & Yoga
Vandey Malaram

Three Worlds
Brahmlok Soul World
Subtle World of Sukshman Shakti
Corporeal World
Brahma Mahanu, Shankar Puris

Golden Age-1250 Years-Heaven
Silver-Age-1250 Years
Copper-Age-1250 Years
Iron-Age-1250 Years
Hell From-Age-1250 Years

Reincarnation of God Father Shiva
Auspicious Confluence Yuga of Brahmins

incorporeal Supreme soul while the couple bead represents the householder in various religions as Brahma-Saraswati, Adam-Bibi, Edam-Eve etc. In both these eras, Bharat meaning whole world was full of diamonds and gems without any piece. Bharat was only one continent and all the lands were connected in one piece. They have kingdom over Bharat meaning whole world and the world was running through powerful thoughts having complete balance of silence and science.

Now cycle of time goes to copper age and the deities or angels become body conscious. They become worshippers from worship worthy, the shock of which is felt on nature leading to semi-destruction making the land of Bharat (world) into seven continents. They commenced worshipping incorporeal supreme soul Shiva as form of light. Since supreme soul is light coming out of point (Bindu) and He is ocean (Sindhu) in qualities, they told the place of residence as Hindustan and their religion as Hindu, because they lost divinity. Now the founders of various religions established four main religions as Islam (Jews family of religion), Buddhism, Christianity and Renunciation (Sanyas) as indicated in form of main branches in the tree. Meanwhile Hindus started worshipping various deities too along with Shiva. The fragmentation of Bharat naturally gives rise to different kingdoms, languages, cultures, dynasties, mutual strife, disunity, divisions etc.

As the cycle of time progresses, Iron Age commences. Here all religion at their lowest level which is divided into many sects, paths, etc. represented in branches and twigs in the tree. There are currently more than 4,300 such religions. Religion and people become diabolic, leading to misery, uproar, time of wickedness and irreligion. In human society, differences arise in language, views, politics, faith, castes, race, state, country, etc., leading human being fight like demon.

Such a world will not last forever and evil will end. The work of establishing peace in the world cannot be done by any human being, only Almighty Supreme being can do it. At such a time the incorporeal Supreme soul Shiva (benefactor) incarnates in body of an ordinary person, gives revelation of establishment and destruction, and names him Prajapita Brahma, who is depicted in various religions as Adidev or Adam or Edam. Supreme Almighty imparts His spiritual knowledge and teachings of Rajyoga by taking support of human body for becoming complete viceless and supremely pure, by which human beings transforms into deity or angel again. Thus supreme soul is the seed of the transformation of the human world which transforms this old world to new i.e. paradise, and the world become old iron aged by itself again, which is depicted as a human genealogical tree.

Let us practise Rajyoga meditation. We are the light form soul and children of supreme soul. Our supreme father, supreme soul is also a form of light, lovingly known as Baba i.e. Father, resides in the supreme abode, possesses all divine qualities and performs divine deeds with his powers. As His children, we are Master Ocean of His knowledge, powers and qualities. We are full of peace, power and purity in our sweet silence home.

We came as pure souls and assume the body of a deity or angel to play our role in the golden age and the silver age depicted in the trunks of the genealogical tree. We lose the power of our divinity by enjoying immense happiness and enter in body consciousness at the beginning of the Copper Age. Due to our body consciousness, nature shocked and semi destruction takes place, in which a lot of wealth is destroyed fragmenting Bharat (world full of diamonds) into seven continents but we do not suffer any bodily damage. We seek supreme soul because of body consciousness. So we started worshiping oval shape light in the form of point of light which is known as Shiva meaning benefactor and He is the ocean of knowledge, power and virtues. By worshiping the supreme soul as point of light (Bindu) and he is Ocean (Sindhu), we believed our place of residence as Hindustan and our religion as Hindu. In this age, the founders of the four major religions, Islam, Buddhism, Christianity and Asceticism (sanyas) have established their religions which are depicted as branches of the human genealogical tree and the souls of their religions descended from supreme abode increasing the human population.

The cycle of time goes on and the Iron Age comes, leading to different sects, paths etc. in each religion. As the human population increases, human souls become miserable and wicked, and cry out to the Almighty, purifier and liberator father to save themselves. Therefore He brings about the revelation of destruction as well as the establishment of a new world and incarnates in common and old human body.

Supreme soul with His knowledge, powers and qualities makes our souls from human beings to deities or angles based on our efforts per His elevated directions (Shrimat). Again after the great transformation through nuclear war, civil war and natural calamities the souls go to their home supreme abode and few human souls enter the new golden age as deities or angels depending on their efforts based on His elevated

directions. In this way we souls play our respective roles in world cycle as depicted in the human genealogical tree.
