

14. The story of rise and fall of human being

The soul and the supreme soul come into the corporeal drama of world cycle to play their respective roles. This world cycle is called the cycle of time or the eternal drama that takes place on the world stage. Soul, supreme soul and world cycle are eternal.

In this world cycle, Supreme soul shows the rise and fall of the human being in the form of a ladder. In Hinduism, ladder of precious metal is donated after death and it is believed that the soul goes to heaven with its help. Indeed this ladder shows the story of how a human soul becomes ordinary human being from a deity or an angel and vice versa who are full of all virtues with the help of His knowledge and rajyoga, which is depicted in the picture.

In the beginning of the human world ladder, all souls having deity or angelic religion and they have complete self sovereignty. Being the kingdom of the deities (kingdom of supreme soul), all traditions and customs were true. During first 1250 years was the Golden age of Sun dynasty of Shri Lakshmi and Shri Narayan. They were full of all virtues, 16 degrees celestial full, completely vicelss, full of code of conduct and have nonviolent, supreme deity or angelic religion, who is worshipped even today. They have 8 generations having initial population of 900,000. Their kingdom was full of happiness, peace, bliss, divine love and power in Bharat (world full of diamonds) that is whole undivided world. Their average lifespan was above 150 years. This world is represented in various religions as "Swarg, Bahist, heaven, paradise, Golden age", which was on our earth. Their souls were with all qualities and powers of Supreme soul.

Deity or angel enjoy their life based on their efforts of their past i.e. use their accumulated power. Thus in Silver age their divine powers are slightly reduced with increase of their population. In these 1250 years, they consider themselves as warrior clan which has nothing to do with any caste or race but reflects power of the soul meaning soul has Sato quality. They have 12 births with average lifespan of one hundred to one hundred twenty five years. Shri Ram and Shri Sita rule for 12 generations and their kingdom was also full of happiness, peace, bliss, divine love and powers. In both these ages, Bharat was undivided world full of diamonds. Bharat was only one continent and all land joined together. They ruled Bharat means the whole world and the world was in

This wonderful creation was created by God. On this earth, human souls lived in longevity after the birth of gods and goddesses with all the holy and divine qualities in the Golden Age. Due to rebirth with time, the arts and qualities of the soul decline with age, human soul takes 84 births till the end of Kali Yuga. But in the last time of this Kali Yuga, the God Himself descends in an old human body on this earth and creates a welfare Purushottam Sangam Yuga to liberate souls from the rising sins and transforms them to deities.

perfect harmony of silence and science with their power of thought or mind.

Now Copper age begins wherein the deity or angel becomes body conscious. Vices enter in them and they become worshipper from worthy of worship, which shocks the nature leading to destruction in which the land of undivided world known as Bharat is divided into seven continents. They commence worshipping by making oval shape incorporeal Supreme soul Shiva. Since Supreme soul is point of light (Bindu) and the ocean (Sindhu) of knowledge, powers and virtues, the place of abode of them called Hindustan and they called Hindu themselves because they lost divinity. Afterwards they worshipped deities and create scriptures. Other four religions Islam, Buddhism, Christianity and Renunciation came through their founders. Due to body consciousness, every soul loses the power of 8 celestial degrees meaning power, become rajoguni (medium quality) and identifies themselves as merchant clan. They took average 21 births in 1250 years.

As the cycle of time progresses, Iron Age starts wherein every religion is divided into many sects, denominations, monasteries etc. There are currently more than 4,300 such religions. There are many types of devotion in every religion and have faith but no knowledge or understanding which is called blind faith. Every soul approaches lowest (shudra) stage. They have almost no power. In this age, due to the decrease in the power of the human soul, they took 42 births and all becomes most vicious (tamopradhan). The political and religious power makes many efforts through the United Nations to establish peace in the world. The Nobel Peace Prize is awarded but peace is nowhere to be seen in the world.

The work of establishing peace in the world cannot be done by any human being, only Almighty Supreme soul can do it. At such times, the incorporeal Supreme soul takes the support of an old body, makes him revelation of destruction and establishment and names him Prajapita Brahma, who is depicted in various religions as Adidev or Adam or Edam. The supreme soul imparts His knowledge and powers and through teachings of Rajyoga shows path to become completely viceless and pure making them Brahman i.e. one whose mind stabilises in the Brahm element meaning soul conscious. This new birth is through spiritual knowledge, the body remains the same, by which the human

soul becomes deity or angels again. This youngest age is called auspicious confluence age, which is the transition age between Iron age and Golden age. Thus human soul has 8 births in Golden age, 12 births in Silver age, 21 births in Copper age, 42 births in Iron age and 1 self transformed birth of auspicious Confluence age with a total of 84 births. The story of this ascent and descent of human being is depicted as a ladder of human world.

Let us do rajyoga meditation. We souls are children of Supreme soul. We souls are full of peace, powers and purity in our supreme abode. We souls took 8 births in golden age with complete happiness, peace, purity and power as deities or angels. Time passed, we lost two degrees in our purity in silver age, so took 12 births. During the half cycle of world drama, Bharat means earth or whole world was full of diamonds and it is the only continent with a perfect balance of science and silence.

Now we souls come to body consciousness, we lose the power of our divinity and copper age begins. We worship worthy souls become worshipers. We started the worship of light form supreme soul in form of point of light which is known as oval shaped light Shiva, who is the ocean of knowledge, powers and virtues. Supreme soul being point (Bindu) and ocean (Sindhu) in qualities, we recognized our religion as Hindu and the place of residence as Hindustan. Nature is shocked by our body consciousness which leads to semi-destruction and the whole of Bharat is divided into seven continents. With the increase of consciousness, we were unable to meditate with light form supreme soul, so started worshiping idols of deities. We wrote the scriptures, lost six degrees of purity due to body consciousness and took an average of 21 births. In order to establish Islam, Buddhism, Christianity and Ascetic religion, messengers of supreme soul came in copper age.

The cycle of time goes on and Iron Age comes in which every religion is divided into different paths, sects, monasteries etc. Our souls lose almost all degrees of purity. Every soul has an average of forty two births and the world becomes a very miserable. Every soul calls the Almighty, purifier and liberator to transform the world. Hence He enters the old human body in Bharat, named him "Prajapita Brahma", who is known as Adam, Edam, Adidev etc. in various religions. Supreme soul by His knowledge and powers makes man equal to deity or angel and transforms iron aged world to golden age. Our souls elevate their lives based on His elevated directions making life equal to Him in purity and

return original residence supreme abode. The souls who do not follow His elevated directions undergoes punishment to be pure to go back home. Thus human souls take maximum 84 births and at least one birth. This is the story of the rise and fall of human souls in 84 births as narrated in Hinduism. Again, based on the present efforts, we souls come from supreme abode to play our respective roles in this world. Om Shanti means we are the peaceful of souls.
