

18. All relationship with supreme soul

Rajyoga means realizing oneself to be the soul and contemplate about the immeasurable knowledge, unlimited powers and divine qualities of supreme soul as well as the cycle of His creation while walking-moving, rising-sitting, eating-drinking, doing every action to become the king of all senses as well as continuous practice of self-transformation leading to world transformation. Since experience is important in Rajyoga, we have to learn by practicing yoga. The four bases of Rajyoga include the company of supreme soul, the inculcation of divine qualities, pure food and the relationship with Him.

The fourth basis of Raja Yoga is all relations with the supreme soul. The praise of supreme soul is "You are the mother and the father. You are the brother and the friend. You are the knowledge and wealth. You are everything for me." The meaning of which is supreme soul is our mother, father, brother, friend, education, wealth and everything we have in life. Each human soul has mainly nine relations with the supreme soul based on our practical life in the world, which is shown in the picture.

Now let us experiment how we can maintain such relationship with Him. Select six individuals from your group of persons consisting of family members, relatives, friends, co-workers etc. You don't have to tell anyone so the choice is yours. Out of these six individuals, make three groups of two persons. So let's get ready. Put the two most favourite persons in the first circle. Then place the other two persons in the second circle and do not repeat persons from the first circle. Now put the last two persons in the third group. Now check if you put supreme soul in any group? When we conduct such experiment with different group of persons, 99% of people say no. Why we do not put anywhere Him yet we are singing that all relationship with Him? We do not know how to relate with Him? So let us understand different relationship to be maintained with Him.

The first relationship of the person is with the mother even in the world. The mother is also the first teacher and also the guide. The mother first teaches us things like eating, drinking, moving, walking, talking, social behaviour etc. Supreme soul, like the mother, teaches all these things through His versions known as Murli (He takes the support of human body to speak as He is incorporeal, form of light, highest, supreme, omniscient, ocean of knowledge, powers and virtues), which are

available free of cost on two websites www.babamurli.com and www.madhubanmurli.org. He also teaches how to think, which is not taught by any person, any institution, family, school, college, university, etc. in this world. Thus supreme soul sustains souls at this time as a mother and through His knowledge and powers make His children worthy of the new world paradise.

Supreme soul is also the father of every human soul. In the world too, children inherit wealth from their father. He incarnates in this world in old human body to transform this world into paradise on His palm, with the help of His knowledge and Rajyoga for His children according to their efforts. The inheritance in the world is usually passed on to male children, but since the inheritance of supreme soul is for the soul, there is no question of gender with Him. Thus He is the true father of every human soul, through whom every soul inherits liberation or liberation in life.

Supreme soul is also the brother of every soul. Just as the worldly brother teaches to walk by holding the finger, so He guides the soul by holding the finger of elevated direction that is shrimat through His daily versions available free of cost on the two websites mentioned above. Elevated directions are given, on which the soul can walk comfortably. He is also the friend of every soul, meaning that the soul can be share anything with Him through thoughts and become light. A friend of the world can speak privately to another, while He is known as a "Godly friend" and always gives understanding and power to His children to solve everything.

Supreme soul is the supreme teacher of souls and regularly publishes free of cost three-page versions every day, which are available free of charge on the two websites mentioned above. These versions of Him are read, heard or available 365 days a year, with no public holidays, weekends or vacation. He is the true guide (satguru) of every soul. There are guides in the world but they do not know where to go after leaving the body because the souls are coming here to play their part on this world drama stage with rebirth which is scientifically proved by hypnosis. Hence He is also accepted as the true guide of all guides because He comes and shows every soul the right path of liberation and liberation in life.

Supreme soul is the surgeon of every soul and performs surgery on the soul i.e. purifies the vicious soul. That is why supreme soul is called purifier. The soul of every religion invokes Him on this world as purifier, liberator when the souls become very vicious and miserable, and He comes and completes his work as a surgeon. He is also the beloved or husband of all souls who adorns the souls with knowledge, powers and virtues and takes them with Him to supreme abode and sends them to paradise according to their efforts. Hence He is also called the husband of all husbands. He protects every soul, that is, takes care of as children, so He also plays a role as a child of the soul.

In this way supreme soul has nine relations with each soul. When we play any role on this world drama stage, we have to remember in our mind that all those relationships are also connected with Him. This practice enhances the remembrance of Him with His virtues so that we too can become like Him per saying "as you think so shall you become" meaning to become a perfect and complete human being, full of His knowledge, powers and virtues meaning deity or angel and paradise will come on this world.

Let us practise Rajyoga meditation. We souls are the children of the supreme soul. He is an ocean of knowledge, powers and virtues and He

does not have His own body so His way of working is unique. We understand ourselves as soul to connect with Him through thoughts and talk. He helps us to solve any problems, situations, people, challenges, obstacles that come in our life by touching our intellect, through His daily versions or by making any person or thing a tool. He gives us souls the complete knowledge of what to think speak and do, hence He plays the role of the mother. As a father, he gives the souls the inheritance of liberation and liberation-in-life according to efforts. According to His elevated versions, He plays role of brother and by sharing all aspects of our life, He plays role of friend. As the supreme teacher, He teaches his elevated versions every day for free, and as the supreme guide, He shows the souls the path to liberation and liberation-in-life. Being supreme surgeon, He purifies the vicious souls and being beloved of all souls, He adorns souls with all the divine qualities i.e. makes us deities or angels. He takes care of the soul and therefore plays a role of child too. While dealing with all actors in form relationship in the world, we should recall all relationship with supreme soul and remember Him which increases His memory and we become master omnipotent. Let us make our life stable, cool, calm, immovable and unshakable which is the goal of our human life. With remembrance of Him our life become full of happiness, purity, power, peace and bliss.
